

Let us simplify your routing processes with EZRouting.™

Intelligent cloud-based routing software that helps simplify your operations and more efficiently manage student transportation logistics in real-time.

Features and Benefits

-  **Streamline your route planning.**
Easily create, optimize, and manage your bus routes.
-  **Evaluate new routing scenarios without impacting current routes.**
Use the Sandbox feature to explore routing options and potential scenarios.
-  **Easily account for students with unique schedules.**
Flexible calendar-based scheduling makes it easy to manage busing for students with different pickup and drop off locations and schedules during the week.
-  **Easily assign students to routes and stops.**
Assign one student or groups of students to new routes or stops in seconds.
-  **Strengthen parent relationships.**
Automate visibility, student information updates, and communication to parents through the new EZ A2B parent app.
-  **Provide turn-by-turn driver directions.**
Tablet-based navigation directions and read-aloud options increase driving safety and driver satisfaction.

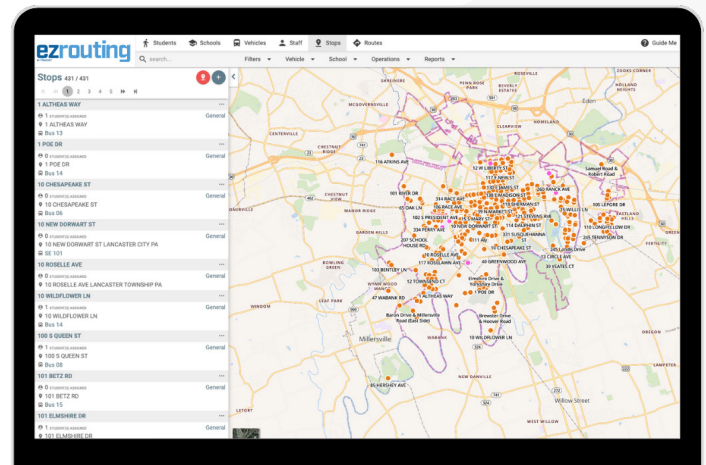

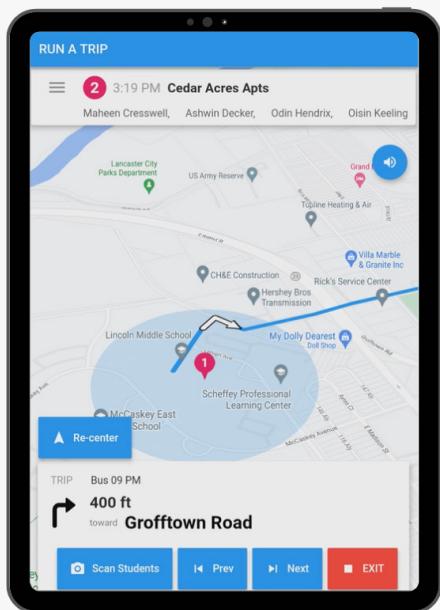

Make Route Planning and Management a Breeze

- ✓ Automatically generate route times based on distance, reported speed limits, and load times set by the district.
- ✓ Easily make manual changes to autogenerated routes to adjust stop times, etc.
- ✓ Quickly adjust or consolidate routes due to driver call-outs, emergencies, or hazard zones.
- ✓ Generate customized student bus passes to include student names, photos, bus assignments, and more.
- ✓ Easily accommodate alternating student schedules, whether they involve different pick-up and drop-off locations, attending school on alternating days, attending classes at different locations during the week, and more.

Explore Routing Scenarios Without Impacting Your "Default" Routes

- ✓ Simulate an unlimited number of routing scenarios without impacting live/default routes in the system.
- ✓ Explore routing scenarios using a wide range of criteria, such as bus capacity, bell schedules, route times, time on bus per student, walking distance to stops, hybrid school schedules, and many others.
- ✓ Evaluate your Sandbox routes and then choose to approve or decline them; approved routes can be used to replace a live route with just a few clicks.

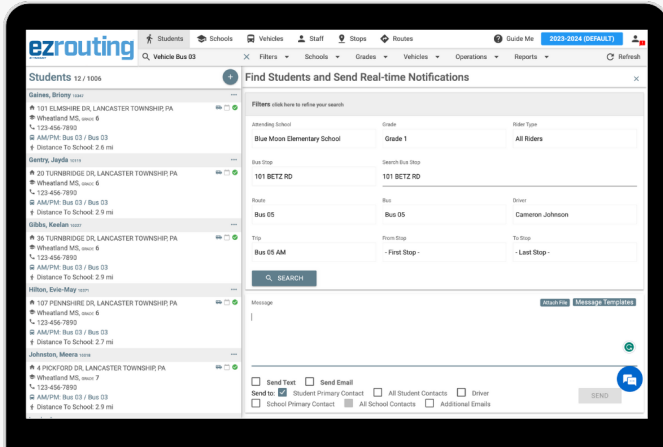

Make Navigation Easier for Your Drivers

- ✓ Provide turn-by-turn audio/visual or audio-only route directions to drivers to improve safety and enhance driver satisfaction.
- ✓ Display a re-route in real-time to drivers if an incorrect turn is made.
- ✓ Immediately "push" route updates to drivers in the event of a last minute change.

Enhance Parent Communication

- ✓ Enable parents/guardians to create multiple, adjustable notification "circles" through our new parent app, EZ A2B, so they receive accurate bus arrival alerts.
- ✓ Allow multiple parents/guardians to access the same student's information through the app, enabling shared oversight and communication.
- ✓ Ensure parents/guardians are able to use the app regardless of their language of choice. The entire app interface, tooltips, resources, and alerts are available in 8 languages (and counting)—eliminating language as a barrier to usage.
- ✓ Quickly and easily answer parent/guardian questions regarding where their child is at any given time during their ride to and from school.

All-Inclusive Routing Software

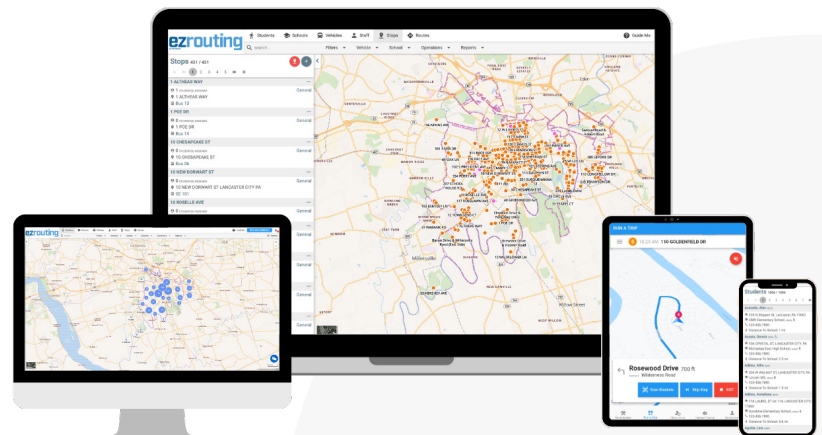

We believe your team should have access to the information they need at the moment they need it. With EZRouting, your routing subscription includes:

- ✓ Unlimited user licenses
- ✓ Free map updates
- ✓ Nightly sync for student information data
- ✓ Unlimited training for the life of your subscription
- ✓ State-of-the-art parent app

About TransAct

For more than 30 years, TransAct has dedicated itself to providing K-12 districts and state departments of education with software solutions that help them streamline their operations, more efficiently meet state and federal requirements, and more safely and effectively serve their students.

Our EZTransportation transportation management platform, designed specifically for K-12 school districts, helps districts more efficiently and effectively manage their transportation programs — planning and scheduling, daily route management, school and parent communication, fleet maintenance, activity trips coordination, and more — all while ensuring the safety of their students and improving driver satisfaction.

Schedule a live tour with us and discover why districts across the country choose TransAct for student transportation management. Or visit our website at www.transact.com.
